You Insure, We Enable

KoverUI

CARRIERS,
UNDERWRITING AGENCIES AND MGAs.

A holistic no-code, API driven insurance system that meets all your business needs in one place: sales, channels, rating, underwriting, invoicing, accounting & operation

Maintain Policy Lifecycle

Access all aspects of a policy, including the initial quote, referrals, invoices, endorsements, renewals, claims, and any associated notes, documents, and messages.

Claims

An end-to-end process, allowing to enter the FNOL, followed by claims officers' validation, assessment, and investigation. It then proceeds to adjustment, payment, and finally settlement.

Reporting Dashboard

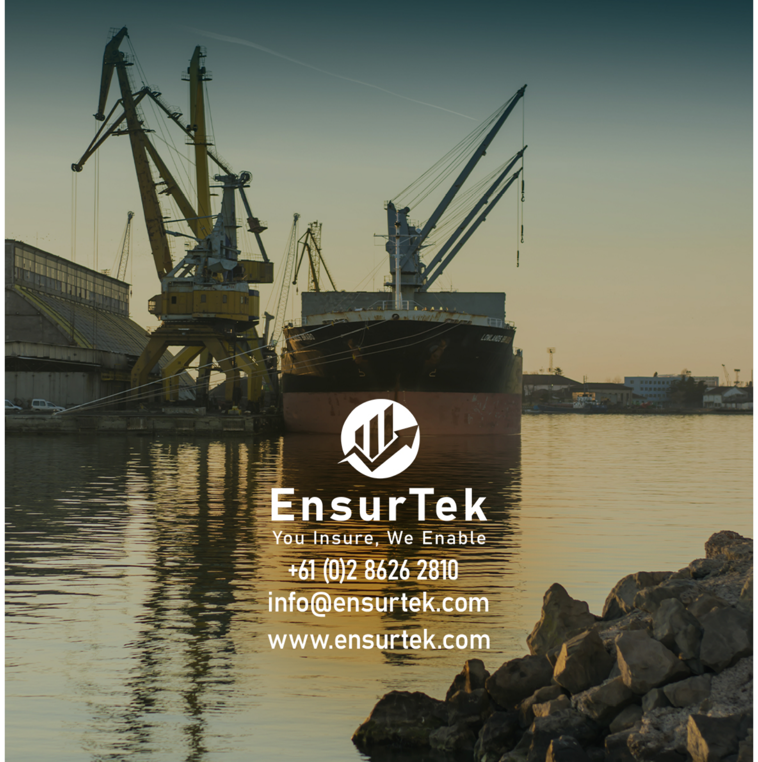
Quickly generate standard reports with a single click or create custom reports, such as bordereau, using various filters for tailored business insights and decision-making.

KoverUI

Platform Offerings

Configure & launch

With our built-in templates, loading risk questions is a breeze. You can enter ratings and set triggers for referrals with ease, and our question attributes allow for pre-worded selections to minimize data entry errors.



Document Manager

Generate and e-mail or print documents. Store & manage all customer documents in one place.

Accounting & Finance

Easily view your trust account, keep track of all payables, receivables, & record all billing once the policy was bounded. Also, you can reconcile receipts, set up automatic payment reminders, & more.

Choose Channels

You only need to configure the system once to use it in portals, mobile apps, web forms, direct-to-consumer channels, and APIs that can be embedded in other systems.
